

Tech Stack

Notes:

- Twitter has a robust API with lots of docs [Twitter API Documentation](#)

Notes:

- Reddit has a robust API with lots of docs [reddit.com: api documentation](#)

Notes:

- Meta has limited APIs but has lots of docs [Meta Developer Documentatio](#)
[n](#)

Notes:

- Bot Layers should be written in **Python** and hosted in the cloud (serverless preferred but whatever is cheapest)
- DeepFake Detection Layer will need to interface with all Bot Layers
- Metrics layer would be desirable for maintaining records and metrics on our system
